

SE 3355 Web Development - Midterm 1

Group 1 – Create a static registration form

Create a form similar to below form that will have following features

Home Categories About Contact

Name
First Name Last Name

Company

Email

Phone
Area Code Phone Number

Subject

Are you beginner?
☐ Yes ☒ No

Register

- One background image
- One form with text, select, radio button, submit button
- Styling will be like above but you can add more if you see the need
- Create a responsive menu with above links. Links need to go a page but pages can be empty
- Email and phone will be validated by javascript/jquery. Phone number must be a Turkish number. You can make a drop down of area codes, but not hard coded
- company and subject drop downs will be retrieved from a mock io that you will create via <https://designer.mocky.io/>. There should be at least 10 items in each drop down
- all fields are required and must be checked via JS on submit
- on submit, form needs to be routed to a new page that will just say 'Form is submitted'. No processing needed at this time

| BURAK İNCE | ARDA HARMAN |
| EFE CENK KAYABAŞI | ALPEREN GÖKBAK |
| BERK POLAT | UGUR AKALIN |
| EGE DEMİR | ELIF PAR |

COMMON REQUIREMENTS

- Every student will do their own midterm, no groups
- You can make assumptions as long as you document in a readme document in github
- All pages must be responsive
- Resulting web page needs to be hosted on a provider. You can use Azure Static App Service or any other free hosting service. Try github pages if Azure does not work
<https://docs.github.com/en/pages/quickstart>

DELIVERABLES

- A document that has
 - o link to source code of the project i.e github
 - o link to deployment
- Document be uploaded to Moodle by November 26th.
